

# LONDON PAINTABLES™ ROOM KITS

WITH HIGH PERFORMANCE ACOUSTIC PANELS YOU CAN PAINT

## New Paintables™ London Room Kits from Primacoustic!

Primacoustic is pleased to announce the Paintables™ versions of the popular London 8™ and London 10™ room kits. These easy-to-use kits include everything you need to turn any room into a great sounding studio or theater.

Designed to address acoustical concerns that are common to all rooms, London kits help control primary reflections, flutter echo and excessive bass. Panels are mounted using Impalers™ that eliminate the use of wall-damaging glue. The London room kits include all the necessary hardware including wall anchors, screws, and even a drill bit, for a quick and easy installation. Each acoustic panel is made from high density 6lb glass wool for even absorption and the panels are edge-treated with resin and then fully encapsulated with micromesh to prevent dusting.

Originally available in a grey, beige or black fabric wrap, London room kits are now available in a pre-painted Absolute White textured finish. Unique is the ability to lightly spray paint the panels without disturbing their acoustic properties. This of course means that you can now color-match the room décor on site using off the shelf latex paint.

As with all Primacoustic panels, the Paintables have been independently tested for acoustic performance and to achieve stringent Class-B EN 13823/EN ISO 11925-2 fire ratings, making them safe for use in all types of installations in all jurisdictions around the world.

**APPLICATIONS:** Home theaters, two-channel audiophile listening rooms, project studios, video post-production suites, theater projection booths, video conferencing rooms, voice-over booths, broadcast suites, and podcast studios.

### Inside every Paintables™ Acoustic Panel:

Class-A fire safety rated compressed glass wool core with 6.0 lbs per ft<sup>2</sup> density for best sound absorption.

Fully encapsulated in acoustically transparent micro-mesh.

Fiberglass tissue shell with paintable textured Absolute White™ latex finish.

Resin hardened edges to preserve crisp architectural lines.
