

# d3 Designer

Technical  
data sheet

d3

## Package Description

---

d3 Designer is the software only version of our d3 production suite, which enables designers, project managers and technicians to work on a unified communication and collaboration platform.

From conceptual pre-visualisation through technical specification, sequencing and content compositing all the way to technical set-up, d3 Designer is the flexible but powerful solution.

Using a dongle to unlock these design features, d3's powerful 3D stage simulator can be used on your own laptop, from which you can build up your show, test different stages and screens, add props, lighting and video content to the timeline, then create fly-through movies to show your client what the show is really going to look like and get it signed off.

When it's show time, just take your d3 project from your own device, transfer it to the on-site d3 rack-mount and press play. Using the same system throughout will continue to save you time and money – it's the d3 promise.

What's in the package: d3 Designer USB key, mini lanyard.

Flexible subscriptions for d3 Designer are available to purchase directly online:

## Minimum Hardware Specifications

---

**Operating System:** Windows 8.1

Embedded Pro

**CPU:** Intel i5 2.3Ghz Quad Core or above

**GPU:** 1GB Video RAM, DX11.1 compatible

**Memory:** 4GB RAM

## Software Features

---

### Design and Previsualise:

Build and save projects  
Make visualiser movies to file  
Make feed movie files  
Make screen grab files  
Input DMX/MIDI/OSC  
Transfer project to d3 system  
MultiEdit in d3 Net

### Playback:

Output video with watermark  
Output DMX with watermark  
Render unwatermarked feed movies to file

## Media File Specifications

---

**Video Playback:** .mov (anim, pjpg, dxv)

**Image Formats:** .bmp, .jpg, .png, .tiff, .tga

**Audio Playback:** .mp3 (44.1kHz, 16-bit, stereo)

## Bundled Software

---

**d3 proprietary:** d3 Production Suite

## Training, Support, Updates and Warranties

---

### Licence subscription includes:

- software upgrades for licence period
- support (via phone or email) for licence period
- Unlimited knowledge base access
